## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Action Summary*

Acknowledgement is made of the receipt of applicant's amendment and remarks, filed March 3, 2003.

Acknowledgement is made of the receipt of applicant's certified copies of priority documents, GB 0007112.6 and GB 0010846.4, submitted January 8, 2003.

Claims 1-11 are pending in this Action.

The last office action is recited below with responses to the argument following:

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered

therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ebert et al (US 4,428,927). The claims are directed to a formulation comprised of a solid masticable portion and one or more reservoir portions encompassed by the masticable portion.

Ebert teaches a chewable, filled one-piece soft elastic gelatin capsule (Abstract). The referenced gelatin capsule comprises about 10-90% by weight gelatin, and taste modifiers (column 2, lines 54-61 and column 5, Examples II and III). The fill may be selected from a variety of materials, including antacids, cough and cold preparation, sore throat remedies, antiseptics, dental preparations and breath fresheners (Abstract).

While the reference is silent regarding the Young's modulus of the solid masticable portion, differences in physical descriptions will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such physical characteristic is critical. In this case, what is the criticality of applicant's claimed value? Where the general conditions of a claim are disclosed in

the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation. *In re Aller*, 220 F.2d 454, 105 USPQ 233, 235 (CCPA 1955).

One of ordinary skill in the art would be motivated to modify the teachings of Ebert with the expectation of creating a chewable product that is broadly applicable to both human and non-human use. The chewable product would deliver consistent streams of medicament to the user of the chewable product.

### *Response to Arguments*

Applicant's arguments filed March 3, 2003 have been fully considered but they are not persuasive. Applicant argues that the cited Ebert reference discloses chewable formulations that include 1-75% of an insoluble masticatory substance, however applicant fails to acknowledge that the disclosed composition is also comprised of soluble materials such as gelatin, glycerin or sorbitol, water, taste modifiers, etc. If a material is soluble then it must also be digestible. Based upon this disclosure in Ebert, it is the examiner's position that the cited art reads on that limitation.

*Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
